## 1 Preface

In a *chess simultaneous exhibition*, often called a *simul*, a stronger player plays multiple games at a time with a number of other players. Many Grandmasters do this kind of exhibition against a lot of opponents, and Mr. G. normally plays against 50 players or more and scores more than 96%.

A *leapfrog simul* is more difficult: Here, two players play against several opponents, playing alternate moves in each game. Since the playing strength of the combination is less than either one's strength and difference in style poses additional challenges, leapfrog simuls yield much inferior results compared to normal simuls.

A few months back, Mr. G. and I tried a leapfrog simul against 6 players, playing 9 games and scoring  $8\frac{1}{2}$ . On December 21, 2012, we tried it again, this time against 12 kids, and scored 15/15.

These trials gave us the confidence to try on a big scale. Mr. G. gives a simul every year to 50+ players, which includes adults and strong players. We decided to make it a leapfrog simul. There were 50 players – 48 kids (some of them strong rated players) and 2 adults –and we won convincingly – 50 wins, no draws, no losses!

This is the full score of all the games, with some analysis.

A note on analysis: These are analyzed as if they are normal chess games. However, it is not possible to play games of that quality in a leapfrog simul, where moves are played without much thought and there is no communication between players making alternate moves. So, take the analysis with a grain of salt!

## 2 The Games

In all games, we took the White pieces. Aryan, who beat Mr. G. in the last  $\operatorname{simul}^1$  tossed a coin to decide who should go first. I made the odd-numbered  $(1, 3, 5, \ldots)$  and Mr. G. made the even-numbered  $(2, 4, 6, \ldots)$  moves.

We won with a 50–0 score, but it was not a clean sweep as the score indicates. Aryan (Game 2.2, Page 12) prepared a dangerous gambit against **d4** and got a winning position against us. We defended the best we could, and Aryan missed several winning chances. After a series of cat-and-mouse maneuvers, the game reached an even Rook and pawn ending. Against Raghu (Game 2.3, Page 17), we had a clear advantage, but took a long time to figure out a winning plan. Fred, the director of *Kolty Chess Club*, *San Jose* and a veteran player, gave us a tough time by playing a complicated game (Game 2, Page 5), but Mr. G.'s timely **24. 24. 24. 36.** simplified the game into an endgame with two solid pawns up. It was not simple even after that, though.

Even though we decided to play safe games, there were some little combinations, which we executed together without trouble. My rook sacrifice 17.  $\Xi$ f6! (and the later 21.  $\Xi \times h6!$ ) against Kushal (Game 2.4, Page 20), Mr. G.'s 10.  $\Delta \times h7+$  against Pryal (Game 2.10, Page 34), my 13.  $\Delta \times h7!$  against Rishi (Game 2.5, Page 22) are some examples. The finale against Fred (Game 2, Page 5) also was well-played by us.

We opened all games with 1. d4 and adopted the *Stonewall formation* or the *Colle system* whenever possible. Several games went beyond this, Fred's Dutch defence (Game 2, Page 5) and Aryan's Englund defence (Game 2.2, Page 12) being two very important ones.

 $<sup>^1\</sup>mathrm{He}$  gave us a lot of trouble this time also. See (Game 2.2, Page 12).

## 2.1 Umesh (odd) & Mr. G (even) – Fred (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Fred

A90: Dutch: 2. c4 2 f6 3. g3 e6

Fred Leffingwell was the strongest opponent in the simul. He is a USCF first category player (Both Mr. G. and I are only second category players) and the director of the famous Kolty Chess Club, San Jose. This is our most prestigeous win in the event. Fred observed that we are playing some convoluted variation of Queen's pawn opening to beat opening preparation, and decided to adopt the Dutch defence to challenge us. He sacrificed a pawn on move 13 and lost another pawn move 18, and a timely 22. \$\mathbb{e}{g}4!\$ and 24. \$\mathbb{e}{e}4!\$ by Mr. G. forced him to enter an endgame with two pawns down. Even two pawns down, he gave us a hard time winning the endgame.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	f5	3		e6
<b>2</b>	c4	rianglef6	4	${}_{\rm f g5}$	
3	$\mathbf{g3}$				

Our original plan was to play  $2 c_3/e_3/2 f_3$  etc. against the Dutch, and play on the Queenside. But I decided to play this variation because the opponent was Fred, and we needed to play the most accurate continuation. The King fianchetto restricts Blacks options:

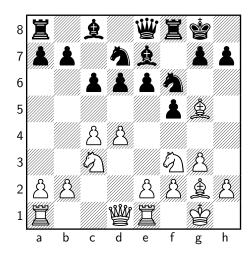

- 1. By preventing ...f4, White can play e2-e4 when there is a chance.
- The Bishop on the h1-a8 diagonal prevents Black's light squared Bishop getting developed on the Queenside.

Mr. G. was not familiar with this variation, but it didn't cause much problems.

White generally do not develop the Queen Bishop early in this variation. 4.  $\text{$\pm g2}$  is correct.

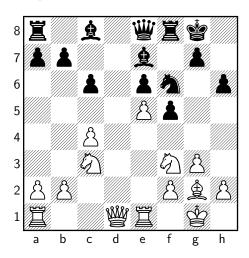

4		<b>≜e7</b>
5		O-O
6	$\textcircled{2}\mathbf{c3}$	d6
7	$\bigcirc$ f $3$	$\operatorname{Dbd7}$
8	O-O	<b>c6</b>
9	$\Xi \mathrm{e}1$	<b>≝e8</b>

Mr. G. took the hint from my last move and snatched the initiative by opening up by...

10	e4!	h6
11	<b>≜×f6</b>	②×f6
12	e5	$_{ m d imes e5}$
<b>13</b>	$_{ m d imes e5}$	

I didn't know what Mr. G. planned as follow-up: 13. d×e5 or 13. ∅×e5. On second thoughts, 13. ∅×e5, securing a strong post for the Knight and controlling many weak points in the Black's camp, is much better.

#### 13 ... ∅e4?!

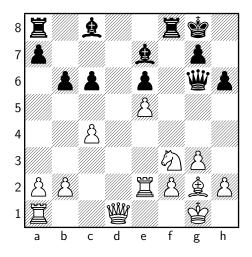

Sacrificing a pawn for nothing. 13...  $\triangle d7$  or 13...  $\triangle h7$  is better.

<b>14</b>	$ ilde{f oxemightarrow} {f xe4}$	$f \times e4$
<b>15</b>	$\Xi{ extbf{x}}{ extbf{e}}4$	₩g6

If Black had plans to play ...b6 and ...\(\delta\)b7, this is the right time. After the Queen leaves e8, queen-side fianchetto becomes difficult.

## 16 **\( \begin{array}{ll} \ext{e2} \\ \ext{b6}? \end{array} \)**

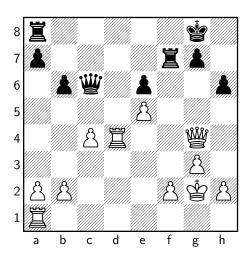

This loses a second pawn. White plays g2-g3 and \$1-g2 against the Dutch defence to prevent developing Black's light squared Bishop this way.

I had considered and rejected by some reason the variation 19. ②e7+ ②xe7 20. ②xb7 罩ad8 21. 豐c2, but didn't see that the Knight controls b4, otherwise would have played 19. b4, forcing 19... ②xc6 ②ad8 21. 豐e1 ②d4 22. ②e4 etc., but the move played is much simpler, especially for a leapfrog simul.

Leaving the b1-h7 diagonal is not good.  $19... \Xi ac8$  was better.

A fine move, anticipating Black's plan. 22. \(\mathbb{e}\)e2! also is good.

24 ... ≝×e4+

Black does not have much choice. The only moves to avoid exchange of Queens -24... **\*\***e8 and 24... **\*\***e8 - allow 25. **\***ad1 or 25. **\***ad6 with a strong position for White.

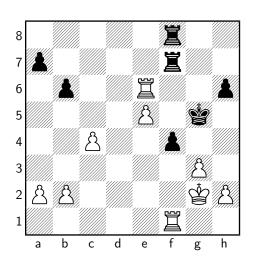

26.  $\Xi$ e2 first and then 27. f4 (If Black doesn't play 26... g5 ) looks like a better move order.

26 ... g5 27 **\(\mathbb{I}**f1\) \(\delta\g7\)

Black should grab the d-file with 27... \( \tilde{\text{Zd8!}} \) here, which was the last chance for counterplay.

This gives Black some chances of counterplay. Simple Queenside expansion with 30. b4 is adequate here. Black doesn't have any counterplay.

29 ... g×f4 30 罩×e6+ 常g5 30... \$\delta f5 31. \$\overline{\text{\$\sigma}}\$×h6 \$\delta \text{\$\sigma}\$×e5 would have been stronger.

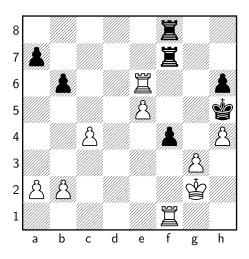

#### 31 h4+!?

Mr. G. didn't like this move. He preferred simplifying with 31. g×f4+ \(\mathbb{Z}\)×f4 \(\mathbb{Z}\)

However, the move played is better, though complicated. The advanced h-pawn will be significant after the simplifications.

31 ... \$\\$h5

31... \$\delta f5\$ 32. \$\bar{\text{2}}\times h6\$ \$\delta \times 6\$ 33. \$\bar{\text{2}}\times h5 + \$\delta e4\$ 34. \$\bar{\text{2}}\$5 +-

32 \( \begin{aligned} & \begin

My idea was after 31. h4 \$\&\delta\$h5, White can play 32. \$\&\delta\$h3!, threatening 33. g4#. All variations seem to favor White:

- A) 32... f×g3 33. \( \mathbb{Z} \times f7 \) \( \mathbb{Z} \times f7 \) 34. \( \mathbb{E} \times g3 \) +-.
- B) 32... 罩g7/罩g8 33. g4 (33. 罩×f4 also is fine.) 罩×g4 33. 罩×h6+ 貸×h6 34. 貸×g4 +-.

However, analysis shows that the simple 32.  $\mathbb{Z}$ d6 with the threats of e6 and  $\mathbb{Z}$ d3 also is very strong.

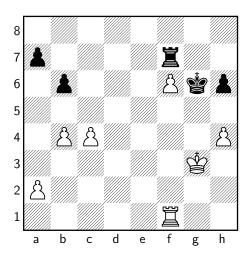

Mr. G.'s move, forcing the trade of a pair of Rooks also is interesting.

 $32 \dots \qquad \qquad \mathbb{Z} \times \mathbf{f6}$   $33 \quad \text{exf6} \qquad \qquad \mathbf{f} \times \mathbf{g3}$ 

After 33... 罩×f6, 34. 增h3! threatens 35... 罩×f4 without losing the pawns. If 35... f3, 36. g4+ 增g6 37. 增g3 wins the pawn. 34. 罩×f4 罩×f4 [34... 罩d6!] 35. g×f4 增g4

(  $\mathrev{$\dot{\$}$}\times \text{h4}$  36. b4 +-) 36. b4  $\mathrev{$\dot{\$}$}\times \text{f4}$  37. c5 bxc5 38. bxc5  $\mathrev{$\dot{\$}$}$ e5 39.  $\mathrev{$\dot{\$}$}$ f3 also wins but with a little more difficulty.

34	<b>\$</b> ×g3	<b>罩f7</b>
35	$\mathbf{b4}$	<b>∲</b> g6

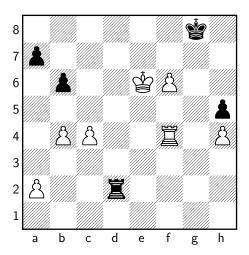

36 \( \begin{aligned} & \begin

Here, Mr. G. is threatening 37. 罩g4+, with 37... 尝xf6 38. 罩f4+ or 37... 尝h7 38. 罩g7+, both forcing the trade of the rooks, and White can win with the extra pawn.

However, the simple 36. c5 is adequete. The funny thing is, neither of us considered playing c4-c5 for quite some time, and were planning some conflicting manuevres.

36		h5
37	<b>‡</b> f3	<b>∳</b> h7
38	<b>∲</b> e4	<b>∲g8</b>
<b>39</b>	<b>\$</b> d5	<b>⊑</b> d7+
<b>40</b>	<b>∲</b> e6	$\Xi d2$

We unwisely allowed Black to activate his Rook and need to play carefully to win. The best move here is 41. \(\mathbb{\su}f5!\), attacking f5 and threatening \(\mathbb{\su}e5\) if the rook checks along the e-file. The move played is fine, but not as effective as before

<b>41</b>	c5	$\Xi \times \mathbf{a}2$
<b>42</b>	cxh6	

42. c6! secures a passed pawn and is more forcing. Now, White needs to go to the King side to win. The more pawns exchanged, the dimmer gets the chance of a win.

42	• • •	a×b6
<b>43</b>	$\Xi \mathrm{d}4$	

Again, 43. \( \frac{1}{2}\)f5 is the right plan.

<b>43</b>		<b>⊑</b> e2+
<b>44</b>	<b>ģ</b> f5	<b>罩f2</b> +
45	<b>ģ</b> g6	<b>罩g2</b> +
46	<b>\$</b> ×h5	<b>∲</b> f7
<b>47</b>	<b>罩f4</b>	$\Xi \mathrm{g}1$
48	<b>ģ</b> h6	$\Xi \mathbf{g2}$
49	買f5	

Threatening 50.  $\Xi g5$ , but 49. h5! would have prevented 49...  $\Xi g6+$ , and 49...  $\Xi g4$  could be met with 50. b5.

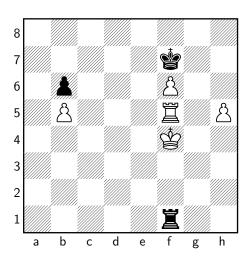

49...  $\Xi$ g4! would have put White in more trouble. White will still win narrowly: 50.  $\Xi$ b5!  $\Xi$ g6+ 51.  $\Theta$ h7  $\Xi$ ×f6 52. h5 and Black is in a *zugzwang*.

#### 50 \$\ddot\dot\begin{array}{c} \delta \dot\begin{array}{c} \dot\delta \delta \de

50.  $\$ h7?  $\$ g4 51. h5  $\$ xb4 will be a disaster.

Mr. G. criticized this move, but I think this is good. 51. 罩5? 罩h8+ 52. 貸g4 貸xf6 will lose another pawn. 51. 罩b5 罩b8 52. 貸h6 貸xf6 also is not good. 51. 貸h6 罩h8+ 52. 貸g5 罩g8+ is not better than the text. Mr. G. must have considered 51. 罩b5 罩b8 52. 貸g5, followed by h4-h5-h6. But this move is at least as strong as that.

51		<b>⊑h8</b> +
$\bf 52$		<b> g</b> 8+
<b>53</b>		$\Xi \mathbf{g} 1$
54	h5	<b>罩f1</b> +

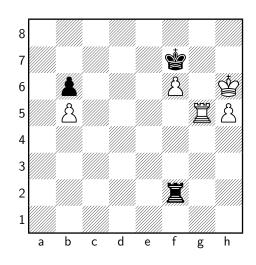

#### 55 **\$e**5?!

Again, Mr. G. and I are following different plans. Mr. G. considers marching the King to the King-side, going ahead of the h-pawn and pushing the pawn behind it. I am considering going to the center and to the Queenside. After a little conflicts and repetitions, I decided to go with Mr. G.'s plan.

56. h6 罩h1 57. 営d6 罩×h6 58. 営c6 was my plan. After this, I decided to follow Mr. G.'s plan, and we didn't have any conflict of interest thereafter.

<b>56</b>		<b>⊑</b> f1+
<b>57</b>		<b></b> g1⊣
<b>58</b>	<b>ģh6</b>	$\Xi \mathbf{g2}$
<b>59</b>	罩g5!	罩 <b>f</b> 2

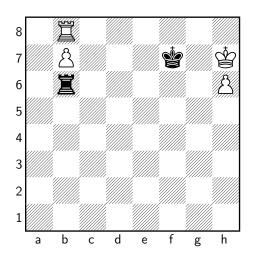

60 罩g7+! 尝×f6 61 罩g6+! 尝f7 62 罩×b6

Now, it is an easy win. Black cannot stop both pawns.

62		<b>罩f</b> 5
<b>63</b>	<b>≌</b> b7+	<b>∲</b> f6
64	<b></b> □ <b>b</b> 8	<b>∲f7</b>
<b>65</b>	$\mathbf{b6}$	$\Xi \mathrm{b}5$
66	<b>b</b> 7	<b>∑</b> b6+
67	<b>∳h7</b>	$\Xi \mathrm{b}5$

### 68 h6 **\(\beta\)**b6

To meet 69.  $\$ h8?? with 69...  $\$ xh6 $\$ , but White has a Killing move.

## 69 **\(\begin{array}{c} \Big 8! \\ \exists \exists \exists \\ \exists \\ \exists \\ \exists \\ \exists \\ \exists \\ \exitter \**

Black resigns. White is threatening 70. b8 $\stackrel{\text{\tiny \'eff}}{=}$ , while after 69...  $\stackrel{\text{\tiny \'eff}}{=}$ ×b7, 70.  $\stackrel{\text{\tiny \'eff}}{=}$ g7+ wins the Rook.

1-0

## 2.2 Umesh (odd) & Mr. G (even) – Aryan (1–0)

• Umesh (odd) & Mr. G (even)

• Aryan

Leapfrog Simul: 2013.01.26

A40i: Englund Gambit

Aryan, who had defeated Mr. G. in the last year's simul, offered the toughest opposition this time. He played the Englund Gambit against our 1. d4, and I, who was not familar with the opening, made some crucial errors in the opening, leading to a lost game, depite Mr. G.'s hard efforts to correct my mistakes. Aryan obtained a winning advantage in less than fifteen moves, but made some inaccurate moves to allow us to level the game. It was a drawn Rook and pawn ending when Aryan again blundered to lose the game. Aryan earned a well-deserved prize.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

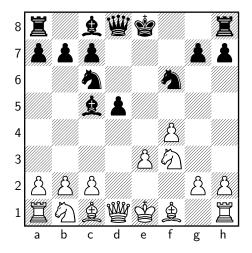

#### 1 d4 e5!?

The Englund Gambit, a very rare gambit against the Queen-pawn opening. This is not popular in serious games, because White gets an advantage if handled correctly. However, it has some surprise value as in this game.

<b>2</b>	$_{ m d imes e5}$	2c $6$
3	f4?	

Being a 1. e4 player throughout my life, I was not aware of this opening, and fell for the trap. 3. f4 is considered inferior in the theory. White should continue with 3.  $\triangle$ f3. Black will recover the pawn but will lose time in doing so.

3		<b>f6</b>
4	$e \times f6$	�×f6
<b>5</b>	2f3	d5
6	e3	$\mathbf{\&c5}$

7 c4?

The start of troubles. White should play 7. \(\delta e 2\) and 8. O-O before opening the lines. I completely overlooked Black's powerful reply.

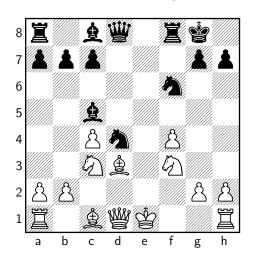

7 ... d4! 8 exd4 ፟∅xd4

9 **å**d3?

Making things worse. After 9. ∅×d4 ೩×d4 10. ≜e2, White cannot castle, but Black doesn't have enough pieces to attack

> 9 ... O-O 10 ₺c3?

10. ∅e5! was the last chance to save the game. After a series of mistakes by White, Black has a winning attack.

10 ... \( \begin{aligned} \Beg

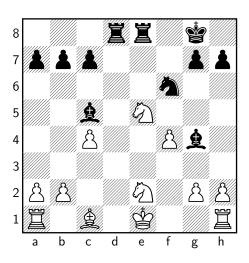

Much stronger is 10... 24! and White is lost. 11.  $22 \times 212$ .  $2\times 24!$  and white is lost. 11. 24! poses all kinds of threats.

## 11 **⊘**e5

Forced. 11.  $\dot{\mathbb{G}}$ d2  $\dot{\mathbb{G}}$ g4 12.  $\dot{\mathbb{G}}$ f1  $\dot{\mathbb{G}}$ ×f3+ 13.  $\dot{\mathbb{G}}$ xf3  $\dot{\mathbb{G}}$ f5 14.  $\dot{\mathbb{G}}$ c2  $\ddot{\mathbb{G}}$ 1-+. 11.  $\dot{\mathbb{G}}$ f1  $\dot{\mathbb{G}}$ ×f3

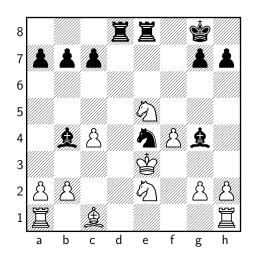

12.  $\text{$\frac{6}{2}$} \times \text{$\frac{6}{2}$} \times$ 

Exchanging Queens didn't reduce Black's attack.

14 ... **≜**b4+

This is good, but 14...  $\underline{\triangle}$ h5, threatening 15...  $\underline{\triangle}$ g4, is stronger. Note that after 14...  $\underline{\triangle}$ e4, White can play 15.  $\underline{\triangle}$ xg4, but Black will still win with 15...  $\underline{\triangle}$ b4+ 16.  $\underline{\triangle}$ d2  $\underline{\triangle}$ xd2 17.  $\underline{\oplus}$ f2  $\underline{\triangle}$ c5+ 18.  $\underline{\oplus}$ e1  $\underline{\triangle}$ xc4. After 14...  $\underline{\triangle}$ h5 15. h3, 15...  $\underline{\triangle}$ e4! is strong.

16 ... **≜**c5+?

16...  $\textcircled{\triangle}$ c5!  $\textcircled{\triangle}$ 17...  $\Xi$ d3+ wins.18.  $\textcircled{\triangle}$ d4  $\textcircled{\triangle}$ d7 wins the pawn back with attack, and the Knight on d4 will fall soon. 16...  $\textcircled{\triangle}$ g5! also is interesting. Looks like Aryan overlooked that the Knight on e4 is unprotected.

17 \$\disp\xe4 \disp\xe2 \tag{2} \tag{8} \tag{2} \disp\xe2

The only move to save the position.

18 ... **≜**b4

Black could obtain two pieces for a Rook by 18...  $\text{$\pm$d3+$}$  19.  $\text{$\pm$f3}$   $\text{$\Xi$\times$e5}$  20. f×e5  $\text{$\Xi$f8+}$  21.  $\text{$\pm$f4}$  g5 22. g3 g×f4 23. g×f4  $\text{$\pm$\times$e4}$ , but this will leave Black with only a small advantage.

Now it is an equal game, but Whire commit more errors.

19 a3 ≜d2 20 b3?

20.  $\triangle \times d2 \stackrel{\cong}{=} \times d2$  21. b3 should give an even game.

Black misses the last chance to win. 20...  $\Xi \times 5!$  21.  $f \times 6$   $d^3 + 22$ .  $f^3 = 68 + 23$ .  $g^3 = 6 \times 63 + 22$ .

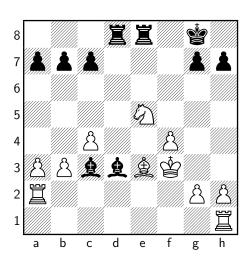

21 **□**a2?

I rejected 21. 罩ac1 because of 21... ≜b2, but White was OK after 22. 罩ce1 ≜d3+23. 營f3, and Black has nothing better than 23... ≜xe5 24. fxe5 罩xe5=.

21 ...  $d^3+$ 

21... 2d! wins because after 22. 2d! 2d! wins a (22... a5! 23. b5 2d!), Black wins a pawn, and later will win a pawn on e5 as well.

#### 22 **\\$**f3

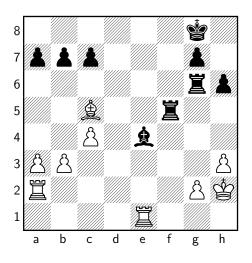

Despite a pawn down, Black still enjoys a small advantage, but by trading pieces to win back the pawn, Black allows an even game.

22		≜×e5
<b>23</b>	$f{ imes}e5$	≌×e5
<b>24</b>	$\Xi e1$	<b>⊑</b> f8+
25	<b>∲</b> g3	$\Xi e6$
<b>26</b>	h3	h6
<b>27</b>	<b>≜</b> f2	

The game is pretty much equal here. Black should continue with 27...  $\Xi \times 1$  28.  $\Delta \times 1$  with an equal game. Instead, Black tries to complicate that lead to trouble.

$\bf 27$		$\mathbf{\mathring{\underline{e}}e4}$
28	$\pm c5$	<b> g</b> 6+
<b>29</b>	angleh $2$	罩f5

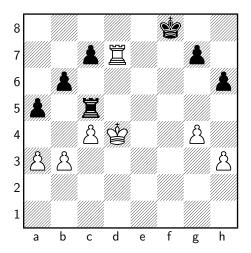

Heading to an equal ending. However, 30. ≜×a7! would have won a pawn.

<b>30</b>		$\Xi \times c5$
<b>31</b>	$\Xi f2$	$\Xi \mathrm{cg} 5$
32	g4	

This helped to bring the King out, but 32. \( \bar{2}e7! \) \( \bar{2}b6 \) 33. b4 \( \bar{2}c6 \) 34. \( \bar{2}f4 \) would have been better.

32		$\Xi d6$
<b>33</b>	<b>ģ</b> g3	<b>⊑</b> d3+
34	<b>ℤ</b> f3	≅×f3+
35	<b>\$</b> ×f3	<b>a</b> 5
<b>36</b>	<b>≝e7</b>	$\Xi \mathrm{c}5$
<b>37</b>	$ dele{e4}$	$\mathbf{b6}$
<b>38</b>	$\mathbf{\dot{r}d4}$	<b>⊈</b> f8
30	<b>買る7</b>	

I considered 39. 罩e5, but was not sure whether it is a win after 39... 罩×e5 40. 堂×e5 堂e7. Later analysis showed that 41. c5! indeed wins. However, Black has 39... 罩c6 as well.

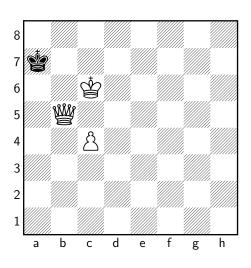

39 ... c6??

Black probably was afraid of 40.  $\Xi$ d5. Exchanging the rooks will favor White, but Black had 40...  $\Xi$ c6. So, 39... g5 was sufficient to draw.

Now, Black is lost.

## 2.3 Umesh (odd) & Mr. G (even) – Raghu, R. (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Raghu, R.

D00d: Queen's Pawn Game: 2. e3

Raghu showed an incredible defence despite having a cramped position, and we had to really struggle to realize an advantage. Having unsuccessfully trying for a breakthrough along the semi-open c-file, we switched to a King side pawn breakthrough, taking advantage of Raghu's weak 27<sup>th</sup> move, and won finally. Raghu got a prize for his performance.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
2	e3	c6
3	${}^{\underline{\diamond}}{ m d}3$	e6
4	$\mathbf{2d2}$	${}^{\underline{\$}}{ m d}6$
<b>5</b>	f4	$\mathbf{g6}$
6	$\odot \mathbf{gf3}$	ହିe7
7	O-O	O-O
8	c4	$d \times c4$
9	$ ilde{f igthappa}  imes {f c4}$	b5
10	$ ilde{ riangle} imes  extbf{d}6$	₩×d6
11	${f ar e 5}$	f5

White has a clear advantage. 12. a4! gives a thematic break, but it was played only three moves later.

12	d d2	$\odot { m d}5$
13	۳c1	

13. a4! is more effective here.

13		<b>≜</b> b7
<b>14</b>	<b>豐b3</b>	a5
15	$\mathbf{a4}$	$\mathbf{b4}$
16	$2\mathbf{c}_{4}$	<b>≝</b> d8
<b>17</b>	$\Xi \mathbf{c2}$	2a6

Black could have obtained a little more breathing space by a temporary pawn sacrifice by 17... c5! 18. d×c5  $\triangle$ d7 19.  $\triangle$ e5  $\triangle$ ×e5 20. d×e5  $\blacksquare$ c7.

18	${f ar 2}{ m e}{f 5}$	<b>≝c7</b>
<b>19</b>	$\Xi { m fc} 1$	$2\mathbf{b8}$
<b>20</b>	<b>≜</b> c4	

I didn't understand this move. I assumed Mr. G. wanted to get rid of the strong Knight on d5, hence my next move. In fact, Mr. G. was threatening to win a pawn by 21. 鱼×d5 e×d5 22. 豐×d5+, which Black immediately defends.

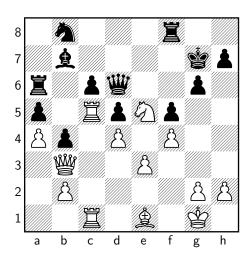

Instead, 20. \&b5! would have won a pawn and broken through the fortress.

20		<b>≝d6</b>
21	∳×d5?!	

21 ... exd5 22 \( \pm \text{e1!} \) \( \pm \text{a6}

Black plays passively. 22... \(\mathbb{Z}\)c8 is better.

23 \( \begin{aligned} \begin{a

24 **₩c2** 

24.  $\mathbb{Z} \times a5! \mathbb{Z} b6 (24... \mathbb{Z} \times a5 25. \mathbb{A} \times b4 +-)$  25.  $\mathbb{Z} ac5 \triangle 26. a5$  wins immediately.

The position is even. Black has a little more active Bishop and control of the cfile, but this is not sufficient to win.

 This move gave us a chance to break through. There was no need for this move, and since White lacks a light-squared Bishop or Knight, it is not possible to break Black's fortress in the Kingside. But after this move, there is a hope for a breakthrough with pawns.

 28
 **數**g5
 **豐**e6

 29
 h3
 **豐**e4

Black should play 29... \(\frac{\tilde{\tilde{\tilde{\tilde{A}}}}{29}\) and make White defend the e3 pawn so that the Queen cannot leave for the King side. It will prevent a future e3-e4 pawn push once the Queens are exchanged.

30 罩e1 常h7 31 g4!

The only chance to fight for a win. 31. **豐**h4 also is good, but White waits to avoid any counterplay like ... **豐**c2.

33 ... 響e8??

33... 豐f3! offers more resistance, due to the threat 34... 豐 $\times$ g4+. For example, 34. g $\times$ h5 g $\times$ h5! (34... 豐 $\times$ h5? 35. 豐 $\times$ h5 g $\times$ h5 g $\times$ h5 36. e4!  $\pm$ ) 35. 三c2 豐g4+36. 豐 $\times$ g4+ h $\times$ g4 37. 含f2 (37. g4! also is good.) and wins the pawn on g3. Defending it will lead to trouble: 37... 含g6 38. 含g3 含f5 39. 2e7 三g8 40. e4+! d $\times$ e4 41. 三c5+ etc.

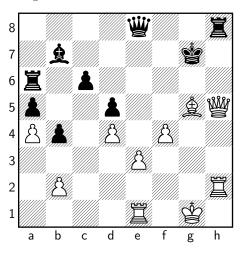

#### 34 罩c2!

This is strong, but 34. e4! dxe4 35. \( \mathbb{Z} e5! \) is stronger.

<b>34</b>		<b></b> a6
35	$\Xi h2$	<b>ģg7</b>
<b>36</b>	$\mathbf{g}\mathbf{\times}\mathbf{h5}$	$\mathrm{g}{ imes}\mathrm{h}5$
37	₩×h5	\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\

Black should try 37... \*\*\*\sh5 38. \( \frac{\pi}{\pi} \text{xh5} \) \$\frac{\pi}{\pi} \text{e8}\$. White still has the advantage and extra pawn, but the presense of opposite-colored Bishops can offer some drawing chances if he manages to exchange the rooks.

The move played loses an exchange and the game.

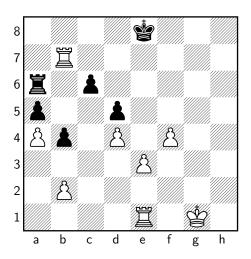

38 \( \pm f6+!

38. 266+96 39. 27+ is a riskier way to win the exchange, because 39...  $2\times 7$  40. 27+ 66 41. 27+ leads to mate.

The simplest, but 39. 豐g5+ 貸f7 40. 豐f5+ 貸e7 41. 豐e5+ 貸d7 42. 罩xh8 offers a stronger attack.

Loses a piece also, but 39...  $\text{@} \times \text{h8}$  40.  $\text{@} \times \text{h8}$  also is hopeless.

In fact, White has a quick checkmate with 41.  $ext{@g7!} \triangle 42$ .  $ext{@c7} \pm .41$ ...  $ext{@e6} 42$ .  $ext{@c7} + ext{@e8} 43$ .  $ext{Zh8}$  mates. But the move played is good enough to win.

With a full rook and pawn down, Black resigns.

#### 1-0

## 2.4 Umesh (odd) & Mr. G (even) – Kushal (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Kushal

A40m: Queen's Pawn Game: 1... e6

Kushal handled the opening well, and could have obtained a perfectly even position on the  $16^{th}$  move, failing which allowed me to obtain an advantage by 17.  $\Xi f6!!$ , a rook sacrifice that destroys Black's defence.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	e6
2	e3	c5
3	c3	$\mathbf{c} \mathbf{\times} \mathbf{d4}$
4	$e \times d4$	d5
5	${}^{}\!$	${ m \&d6}$
6	$ ule{e}{2}$	266
7	m &g5	h6
8	<b>≜×f6</b>	豐×f6
9	rianglef $3$	${ m  riangled}{ m d}7$
10	$\textcircled{b}\mathbf{d2}$	$2 c_6$
11	O-O	O-O
12	<b>≌</b> ae1	$\Xi ae8$

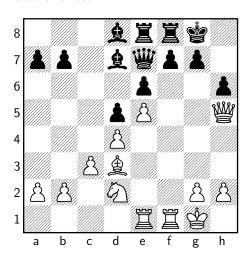

Kushal handled the opening pretty well, and obtained an equal position.

<b>13</b>	${\it  ilde{ ext{D}}}{ m e5}$	₩e7
<b>14</b>	f4	②×e5
15	$f{ imes}e5$	<b>≜c7</b>
16	₩h5	

This allows 16... 豐g5! neutralizing White's initiative. 16. ≜b1, intending 17. 豐d3 would be interesting.

Kushal prepares 17... g5!, exchanging the Queens and neutralizing the attack

without compromising the pawn structure. White finds a neat combination to beat this idea.

#### 17 \( \begin{aligned} \Begin{a

Preventing both ...  $\mbox{$\mbox{$\mbox{$$\'ef}$}$}$  and the freeing ... f5, and preaparing for the killing  $\mbox{$\mbox{$\mbox{$$\'eh}$}$} \times h6!$ . 17... g×f6 will lose quickly by 18.  $\mbox{$\mbox{$\mbox{$\'eh}$}$} \times h6$  f5 19.  $\mbox{$\mbox{$\mbox{$$\'eh}$}$}$  with 20.  $\mbox{$\mbox{$\mbox{$$$$$}$}$}$ g3+ or 20.  $\mbox{$\mbox{$\mbox{$$$$}$}$}$ h3+ following.

Kushal tried to defend well, without falling into this immediate checkmate,

but White's attack was too strong to defend.

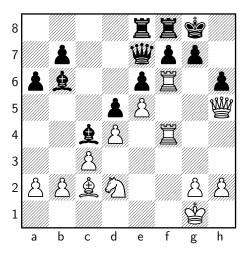

18.  $\Xi$ e3! is a stronger way to continue attack.

Black should play 18... \(\right)b5!\) even though 19. \(\right)\xib5 axb5 20. \(\right)1f3\) still wins for White.

#### 19 **🖺**1f4

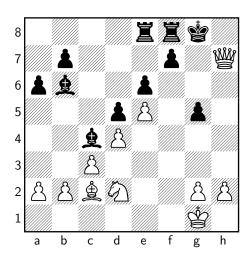

There was no need for this preparatory move. 19.  $\Xi \times h6!$  g×h6 20.  $\Xi f6!$  wins immediately.

Again, 20.  $\Xi \times h6!$  g×h6 21.  $\Xi$ g4+ wins.

White conducts the final winning attack.

21	≅×h6!	$g \times h6$
22	<b>罩g</b> 4+	$ egin{array}{c}  egin{array}$
<b>23</b>	<b>罩</b> ×g <b>5</b> +	$h \times g5$
24	<b>₩h7</b> #	

1-0

## 2.5 Umesh (odd) & Mr. G (even) – Rishi (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Rishi

A40m: Queen's Pawn Game: 1... e6

Rishi made some opening mistakes and ended up in an inferior position. A small pseudosacrifice won us a pawn with attack, which led to win of Black's Queen and subsequent checkmate.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	e6
<b>2</b>	e3	${}^{}\!$
3	${}^{}\!$	<b>⊘</b> f6
4	$\mathbf{2d2}$	${f e5}$
5	$_{ m d imes e5}$	≜×e5
6	$\odot \mathbf{gf3}$	

6. ②c4 豐e7 7. ②×e5 豐×e5 8. ②f3 ±.

6		<b>≜</b> d6
7	e4	Ø\h5′

7... O-O (to meet 8. e5 with 8...  $\Xi$ e8 ) or 7...  $\triangle$ c6 , is better.

#### 8 ②c4 O-O?

9	$ ilde{ riangle} imes  extbf{d}6$	$\mathbf{c} \times \mathbf{d} \mathbf{c}$
10	O-O	d5?
11	exd5	d6

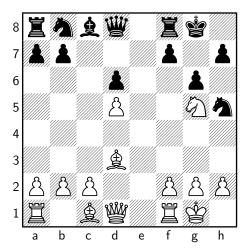

Black sacrificed a pawn hoping to develop his light-squared Bishop, but he is too much lagging in development.

#### 12 **公**g5

12. 魚×h7+! 增×h7 13. 公g5+ 曾g8 14. 豐×h5 wins a pawn with attack. After 13... Kg6, 14. g4! is strong, because after 14... 公f6 15. 豐d3+ 公e4 16. 豐×e4 f5 17. 豐g2, White has a winning attack; so, Black needs to play 14... 罩h8 15. 曾h1!, with 16. g×h5 罩×h5 17. 罩g1 coming.

#### 12 ... g6?

12...  $\bigcirc$ f6 was necessary. Now White wins a pawn and obtains a dangerous attack by a little combination.

### 13 ᡚ×h7! 增×h7

13... 罩e8 is better, but White still wins after 14. g5 掌c7 15. খf3 +--.

## 14 豐×h5+ 曾g7

After 14... \$g8, 15. \$xg6! gives White a crushing attack.

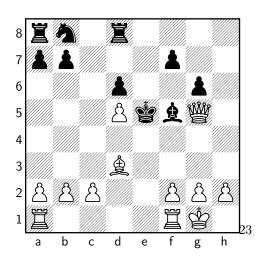

#### 15 **營h6+ 營f6**

After 15... \$\display\$ g8, White can still play 16. \$\delta \times g6\$, like in the previous note; but since the Queen is not attacked, stronger is 16. \$\delta g5!\$, followed by 17. \$\delta f6!\$, checkmating.

#### 16 **g**5+

This wins the Queen, but after 16.  $\Xi$ e1!, there is no way to stop the checkmate by 16.  $\pm$ g5 $\pm$ .

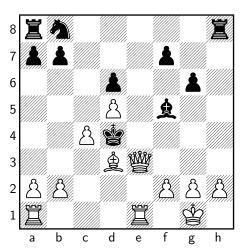

I thought for some time whether there is an immediate checkmate, but couldn't find one, so went on to win the Queen.

There is a hanging rook on d8, but there may be checkmate in sight!

#### 19 c4! \(\begin{array}{c} \begin{array}{c} \text{Th8} \end{array}\)

<b>20</b>	<b>⊑</b> fe1+	rightharpoons delta d
<b>21</b>	<b>₩e3</b> #	

1-0

## 2.6 Umesh (odd) & Mr. G (even) – Manu (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

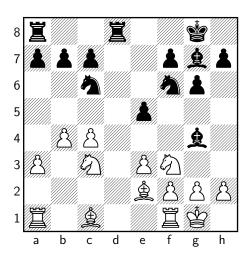

• Manu

A48c: Neo-King's Indian

Manu was the only player, other than Aryan (Game 2.2, Page 12), who could have obtained an advantage over us. He had a chance to win a pawn on move 12, and to get an active game on move 13, but missed both by playing the right moves in the wrong order. We won a pawn on move 16 and second pawn on move 18, and the rest of the game was simple technique. Then Manu blundered a rook and paved way for White's advanced pawn on move 21, causing an earlier defeat.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	$\bigcirc$ f6
<b>2</b>	e3	${f g6}$
3	$\odot$ f3	${ m \&g7}$
4	$\mathbf{\mathring{\underline{e}}e2}$	e6
5	c4	O-O
6	O-O	d6
7	$\odot \mathbf{c3}$	$\odot \mathbf{c6}$
8	a3	e5
9	$_{ m d imes e5}$	$_{ m d imes e5}$
10	豐×d8	≌×d8
11	$\mathbf{b4}$	<b>≜g4</b>

#### 12 **≜**b2?

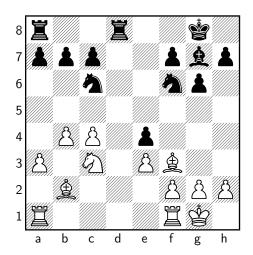

White should continue 12.  $\Xi d1$  before moving the Bishop because the squares on the d-file become weak.

12 ... ≜×f3

Black can win a pawn immediately with 12... e4! 13.  $\triangle$ d4 (13.  $\triangle$ e1??  $\triangle$ xe2  $\exists$ d2 -+)  $\triangle$ xd4 14. exd4  $\exists$ xd4.

#### 

Here, 13... \( \bar{\textsf} \] d2! is interesting, but after 14. \( \bar{\textsf} \) ab1, White is fine.

Losses a pawn. Black should try 15... 2d2!, and now 16. 4f6 3d6 17. 4xc6 3xc6 18. 3fd1 2xc4 19. 4d4, and Black has recovered his pawn.

16 ≜×e4 **②**e5 17 c5

White could win one more pawn by 17. &xb7  $\Xi ab8$  18. &a6.

17 ... ②c4?

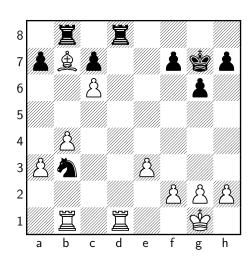

17... c6 was necessary.

Much simpler is 19. ≜×a8 ᡚ×f1 20. ७×f1 ℤ×a8 21. ℤd1, getting hold of the d-file.

19 ... **Z**ab8 20 c6?!

Not sure whether shutting off the Bishop from the game is a good idea.

20 ... ⊘b3 21 ≌ab1

21 ... \(\mathbb{Z}\)d6??

This blunder causes a piece. After 21... 1d2 22. 1a1/c1 (22. 1b2?? 1f3+!) 2b3, White should play 23. 1xd8 1xd8 24. 1e1 to avoid repeating the position.

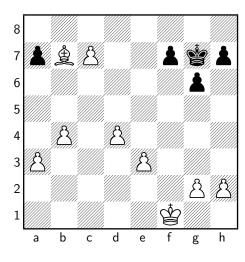

Why not 24. c7? It is interesting that this didn't happen for three more moves.

<b>24</b>		d4
25	$\mathbf{e} \mathbf{x} \mathbf{d} 4$	$\Xi e 8$
26	⊈f1	

Need to guard against the mate threat. 26.  $\Xi$ 63! also is strong.

<b>26</b>		$\Xi \mathrm{e}6$
<b>27</b>	c7	$\Xi e 8$
28	$\Xi e3$	$\Xi \times e3$
29	fxe3	

Black resigns.

1–0

## 2.7 Umesh (odd) & Mr. G (even) – Anurag (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Anurag

D00d: Queen's Pawn Game: 2. e3

Anurag handled the opening well, but played passively to allow us to gain a tremendous initiative on the Queenside, where he castled. We won a pawn and control of the a-file, and while we were launching a powerful attack, Anurag overlooked that his Queen is attacked. After that the game was dead lost.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
<b>2</b>	e3	e6
3	<b>≜</b> d3	$\mathbf{\Phi}\mathbf{c}6$
4	f4	$2\mathbf{b4}$
<b>5</b>	$\mathbf{\mathring{\underline{e}}e2}$	$\operatorname{f ar W} d6$
6	c3	$\triangle a6$
7	$\odot$ f3	<b>≜</b> d7
8	$\textcircled{b}\mathbf{d2}$	0-0-0
9	${f @e5}$	<b>≜</b> e8
10	O-O	<b>f</b> 6
11	$\odot \mathrm{ef3}$	<b>≜</b> h5
12	b4	<b>©e7</b>
13	b5	<b>≜</b> ×f3
<b>14</b>	≜×f3	2b8
<b>15</b>	$\mathbf{a4}$	

The material is even, but Black's moves were very passive, and as a result, White obtained an initiative in the Queenside, where Black castled. White has a clear advantage.

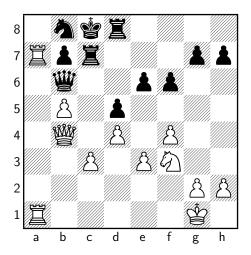

15		c6
16	<b>≜</b> a3	<b>≝c7</b>
17	<b>豐b3</b>	${\mathfrak D}{ m f}{f 5}$
10	置fo.1	

18. c4! is a stronger way to protect the e3-pawn.

18		$c \times b5$
19	$a \times b5$	②h4?

Black should play 19... b6 or 19... \(\delta\)×a3 a6 to avoid losing a pawn, but White opens up the position with c4! in both cases.

<b>20</b>	≜×f8	≌h×f8
21	≅×a7	<ul><li>⟨∆×f3+</li></ul>
22	⁄⊡×f3	<b>₩</b> b6
<b>23</b>	<b>⊑</b> ea1	<b>罩f7</b>
24	豐b4	$\mathbf{\Xi}\mathbf{c7}$

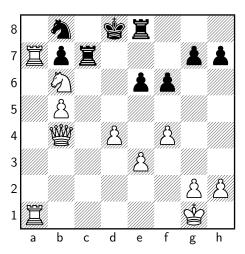

White has won a pawn and enjoys a great advantage due to the control of the a-file, initiative in the queen-side and forcing the Black pieces into passive positions. The next white move prevents  $25... \, \Xi c4$  and threatens  $26... \, c4...$ 

25	$\mathbf{2d2!}$	$\Xi e 8$
26	c4!	$_{ m d imes c4}$
<b>27</b>	$@ imes\mathbf{c4}$	<b>∳d7?</b> ?

Overlooking that the Queen is attacked. But the Queen has no square to go, so Black should play 27... 罩xc4 28. 豐xc4 営d7. Probably, Anurag was considering this and played the second move first, losing his Queen.

#### 28 ②×b6+ **\$d8**

In the game, by some mistake, the Rook was on f8 instead of e8. I checkmated with 29.  $\text{$\frac{w}{1}$} \times \text{$f8$} \pm \text{$f$}$ . In any case, 29.  $\text{$\frac{w}{1}$} d6+$  is crushing.

1-0

## 2.8 Umesh (odd) & Mr. G (even) – Indra (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

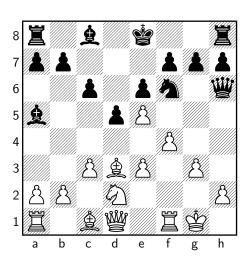

• Indra

D00d: Queen's Pawn Game: 2. e3

Indra didn't do well in the opening, but we also didn't exploit the mistakes. Indra had a chance to equalize, but committed a blunder on move 17 losing the Queen, and lost pretty soon thereafter.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
Т	<b>u</b> 4	uэ
<b>2</b>	e3	c6
3	<b>≜</b> d3	e6
4	$\mathbf{\Theta}\mathbf{d2}$	<b>≜</b> b4
5	c3	≜a5
6	f4	<b>₩h4</b> +
7	$\mathbf{g3}$	<b>₩h6</b>
8	$\odot \mathbf{gf3}$	2f6
9	O-O	$\mathrm{Dbd7}$
10	${f ar Qe5}$	$\odot \times e5$
11	$_{ m dxe5}$	

11 ... **②h5**?

11... ②d7 was necessary.

12 e4?

An unfortunate necessity, because 11.  $f \times 6$  will lose the pawn on e3: 12...  $@ \times 6 + 13$ .  $E \times 6$   $d \times 6$  white doesn't have enough time to double the major pieces.

12. g4! would have won the Knight. That move has a hidden threat of 13. g5! also, winning the Queen.

<b>12</b>		$d \times e4$
<b>13</b>	$\odot \times \mathbf{e4}$	<b>≜</b> b6+
<b>14</b>	$ rightharpoonset{}^{lack}\mathbf{g2}$	f5
<b>15</b>	$e \times f6$	

15. ②d6+ 當e7 16. g4 is stronger: 16... f×g4 17. f5 魚e3 18. 豐×g4 魚×c1 19. 罩a×c1 +-; 16... 豐g6 17. h3 △18. 當h2 +-.

15		�\×f6
<b>16</b>	②×f6+	$g \times f6$

After 16...  $g \times f6$ , White doesn't have much advantage to claim.

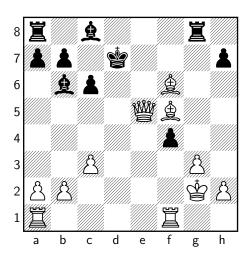

#### 17 f5 exf5??

Overlooking that the Queen is attacked. However, after 17... 豐g7 18. f×e6 魚×e6 19. 罩e1 and White has initiative. An interesting variation is 19... O-O-O 20. 罩×e6 豐d7 21. 魚f5! 豐×d1 22. 罩d6+ 含c7 23. 罩×d1 罩×d1 24. 魚f4+ 罩d6 25. 罩e1 罩hd8 26. 罩e7+ 含b8 27. 罩×h7, and White has all chances to win. However, this is almost impossible to calculate in a leapfrog simul!

After this blunder, the game is pretty uninteresting.

1-0

## 2.9 Umesh (odd) & Mr. G (even) - Nandit (1-0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Nandit

D00d: Queen's Pawn Game: 2. e3

Nandit made a weak sixth move, allowing us to win a Bishop for two pawns. This compromised our King's safety, but before Nandit's other pieces joined the attack, we could exchange the queens. The rest was simple technique.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

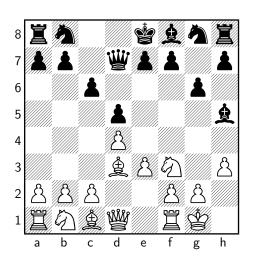

1	d4	${f d5}$
2	e3	c6
3	${}^{}\!$	${f g6}$
4	$2\mathbf{f}$ 3	<b>≜g4</b>
5	O-O	delta d7
6	h3	<b>≜</b> h5?

Queens could be exchanged before Black could develop more pieces.

7	$\mathbf{g4}$	≜×g4
8	$h \times g4$	₩×g4-
9	rightharpoonsellehn1	<b>₩h3</b> +

After 6...  $\ xilde{x}$  xf3 7.  $\ xilde{x}$  xf3  $\ xilde{x}$  f6, Black is OK.

9... ②f6 10. ②h2 豐h4 11. 豐f3 leads to the same position as in the game.

10 ∅h2 ∅f6

Black cannot avoid exchanging Queens: 11...  $\mbox{@}h4$  12.  $\mbox{@}g3$  +--.

11	$\mathbf{\Theta}\mathbf{d2}$	ପି $dxe5$ ?
12	$_{ m d imes e5}$	$\odot \times e5$

6 ... \(\dag{b}4+??\)

The Bishop on g4 is attacked, so this move leaves both the Bishops under attack by pawns, thereby losing one of them.

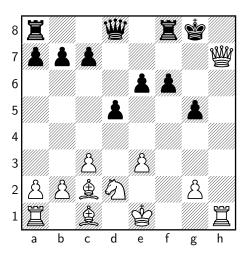

I didn't see 13.  $\& \times h7+$ . After 13... & h8 14. & f3 is strong. 14...  $\& \times g4$  15. & d4! & f6 16. & d3+ & g8 17. & h4 mates.

Nikhil continued to make blunders to make this oversight obsolete.

Mr. G. also missed that the h7 pawn is twice attacked. He could have played 14.  $2\times h7 + 8h8$  15.  $2\times g4$ .

14 ... g5?

 $14...\ f5\ 15.$   $\mbox{\@h}6\ \mbox{\/}$  would have delayed the chackmate, but not very longer.

1–0

## 2.31 Umesh (odd) & Mr. G (even) – Austin (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Austin

D00e: Queen's Pawn Game: Stonewall Attack

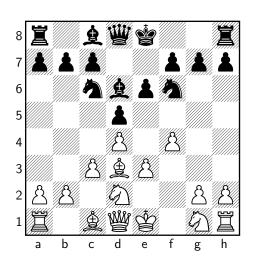

Austin blundered two pieces on move 6 and move 7, and resigned the game on move 11. This was the shortest game in the event.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
<b>2</b>	e3	$\odot$ f6
3	<b>≜</b> d3	$\odot c6$
4	f4	e6
5	$\mathbf{\hat{\triangle}d2}$	<b>≜</b> d6
6	c3	

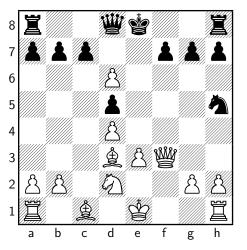

This move leaves a Bishop and a Knight forked by a pawn.

8	$f \times e5$	<b>≜g4</b>
9	$\odot \mathbf{gf3}$	$2\mathbf{h}_{5}$
10	$e \times d6$	≜×f3
11	₩×f3	

Austin starts to make a series of blunders here. The next move gives up a Knight for a pawn.

6		ପ×d4??
7	$\mathbf{c} \mathbf{\times} \mathbf{d4}$	e5??

Austin gave up the game here. 1–0

## 2.32 Umesh (odd) & Mr. G (even) - Kevin (1-0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Kevin

D00d: Queen's Pawn Game: 2. e3

I made a mistake in the opening, but Kevin did not takw advantage of that. However, he played the game pretty well, but overlooked the loss of his Queen and subsequently resigned.

 $I\ made\ the\ odd\text{-}numbered\ moves\ and\ Mr.\ G.\ made\ the\ even\text{-}numbered\ moves\ for\ White}.$ 

1	d4	d5	7	≜×f5	$e \times f5$
<b>2</b>	e3	$\mathbf{\hat{\triangle}c6}$	8	<b><b>②</b>f3</b>	${f @e4}$
3	f4	$2\mathbf{f}$ 6	9	O-O	<b>@f6</b>
4	<b>≜</b> d3	$\textcircled{2}\mathbf{b4}$	10	a3	$5\mathbf{c6}$
5	<b>≜e2</b> ?		11	$\textcircled{0}\mathbf{bd2}$	$@\times d2?$

Simple 5.  $\bigcirc$ f3  $\bigcirc$ xd3 6. cxd3! is the right way to continue here.

5 ... \(\pm\$f5!\) 6 \(\pm\$d3!\)

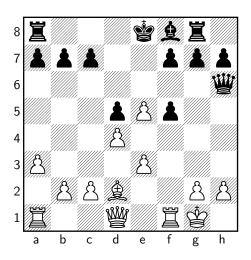

Mr. G. corrects my mistake. I would have played 6. ②a3 e6 7. c3 ②c6 8. ②b1, but the Bishop on f5 will give White a lot of trouble.

It is typical that in a leapfrog simul, one player just reverses the other player's move like this!

6 ... e6?

Black should not exchange this strong Knight. If White takes, Black would get a strong pawn on e4. Now White has a favorable position.

12	$\pm \times d2$	<b>ℤ</b> g8?!
<b>13</b>	$\odot { m e5}$	$ ilde{ ilde{2}}$ xe $5$
14	$f \times e5$	<b>₩h6?</b>

#### 15 e4?!

Simple 15.  $\mathbb{Z} \times f5$  is better.

15 ... f×e4??

15... **\*\***b6 would have kept the pawn,

even though White has a clear advantage.

#### 16 **≜**×h6

Having lost the Queen, Black resigns.

#### 2.33 Umesh (odd) & Mr. G (even) – Haritha (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

 $\bullet$  Haritha

A40j: Queen's Pawn Game: Bogoljbow-Miles Defence

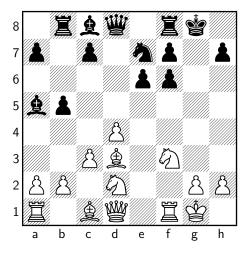

Haritha blundered a piece on move 11, and didn't defend the weakened king-side properly thereafter, allowing us to checkmate in 18 moves.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	$2\mathbf{c}_{6}$
2	e3	$2\mathbf{f6}$

#### 2.35 Umesh (odd) & Mr. G (even) – Laasya (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Laasya

A40j: Queen's Pawn Game: Bogoljbow-Miles Defence

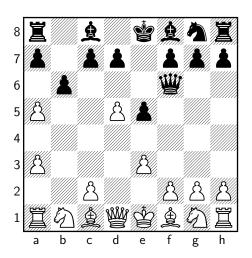

Laasya moved her knight to the edge of the board, and allowed it to get trapped there. On move 11, she blundered her Queen as well, and then allowed a checkmate on move 19.

 $I\ made\ the\ odd\text{-}numbered\ moves\ and\ Mr.\ G.\ made\ the\ even\text{-}numbered\ moves\ for\ White}.$ 

1	d4	$\mathbf{\triangle c6}$
<b>2</b>	e3	${f e5}$
3	d5	<b>⊘</b> a5
4	a3	<b>₩e7?</b> ?

Black didn't realize the shrewed intention of White's fourth move, lest she would have played 4... b6, giving the Knight an escape square.

5	$\mathbf{b4}$	$\mathbf{b6}$
6	$b \times a5$	<b>₩</b> f6

7 a6?

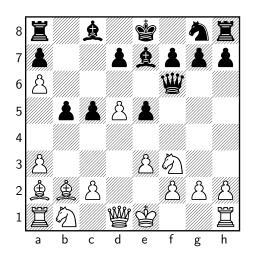

7. axb6 axb6 8. \( \bar{2}\)b2 is better. I didn't want to get the Black rook activated by the open file, and thought the pawn on a6 would cramp Black's position.

7 ... <u>\$e</u>7

7... e4! would have forced White to play 8. c3 and prevented the development of both the Knights to f3 and c3.

To compliment White's seventh move, White should continue with 8. a4, but it is already late to play \(\beta\)b2 because of Black's threat \(...\) e4.

8		c6
9	&c4	b5
10	<b>≜</b> a2	c5
11	Ø\f3	

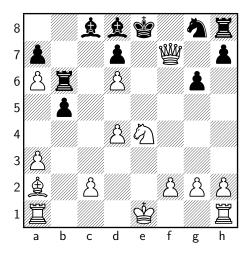

Instead of winning a pawn with 11...  $\pm \times a6$ , Black blunders her Queen. Probably she thought it is a *double attack* against the Bishop and the Knight!

11		e4??
12	≜×f6	≜×f6
12	Ød4	

At the board, I didn't realize that Mr. G. just captured Laasya's Queen, but thought he made a blunder allowing two of our pieces (the Knight on f3 and the Rook on a1) hanging, so played this

move choosing the lesser evil. 13. d6! was much better, because if Black takes either piece, 14. **a**d5! threatens checkmate on f7 and winning the Rook on a8.

<b>13</b>	• • •	$c \times d4$

#### 2.45 Umesh (odd) & Mr. G (even) – Shriya (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Shriya

A40j: Queen's Pawn Game: Bogoljbow-Miles Defence

Shriya sacrificed to Bishop on move 5 for an apparant attack on c2, but that didn't work, and she lost another piece. After the exchange of Queens, it was pretty easy for us to win the game.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	$\Omega c6$
2	e3	d5
3	<b>f4</b>	<b>≜</b> f5
4	a3	e6
5	$\mathbf{2d2}$	<b>≜b4?</b>
6	$a \times b4$	ହିxb4

 $\$ \$\delta \times d3 \ 8. \ c\times d3 \ \times \times d3 + 9. \ \delta e2 \ \times \times c1 \ 10. \delta \times c1 \ \text{are favorable for White.}

The move played allows Black to have a strong pawn on e4 or d3, but allows White to safely castle.

7		$d \times e4$
8	c3	<b>⊘d3</b> +

 $8... \triangle d5!$ , with a strong Pawn on e3 and the threat of ... e3, is better.

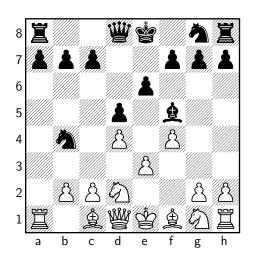

#### 9 **≜**×d3 e3??

Shriya miscalculated. She might have thought that both the Bishop and the Knight are attacked and she will win one of them. For example, 10.  $\pm \times 11$ .  $\times 12$  e×f5. She missed Mr. G.'s next move.

Instead, 9... e×d3 was better, even though after 10.  $\bigcirc$ gf3, White still has the advantage, thanks to the extra piece.

#### 10 ②c4!

Saves both pieces. However, 10. 2e4! would have preserved the strong light-squared Bishop.

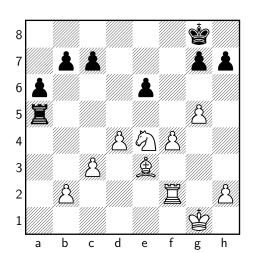

7 e4?!

It is better to give up a pawn and stop the attack by 7. 243. Now both 7...  $2\times 43 + 8$ .  $4\times 43 + 8$ .  $4\times 43 + 8$ .  $4\times 43 + 8$ .

<b>10</b>		$ riangle  imes  ext{d}3$
11	豐×d3	$ ed{f w}{ m d}5$
12	$@ ext{xe}3$	$ ede{h}5$
<b>13</b>	$ ule{e}2$	$\Psi \times e2+$
<b>14</b>	$\triangle \times \mathbf{e2}$	

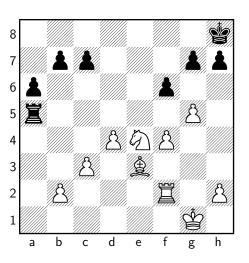

The Queens are exchanged, with White having two extra pieces. The rest is simple.

14		<b><b>②f</b>6</b>
15	O-O	2 e4
<b>16</b>	$\odot \mathbf{g4}$	O-O
<b>17</b>	${\rm \&e3}$	f5

#### 2.47 Umesh (odd) & Mr. G (even) – Eeswar (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

• Eeswar

A45d: Indian Defence: 2. e3

Easwar has a slightly better position after nine moves, but starting from move 10, he played weak moves. He gave up a piece on move 11, a second piece on move 14, a pawn on move 18... and finally we had too much material. Mr. G. converted into an easy won endgame. The rest was easy for us.

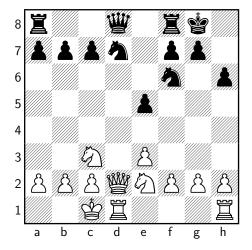

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	$\Omega$ f $6$
<b>2</b>	e3	d6
3	${}^{\dot{\underline{\bf d}}}{}$ d3	e5
4	$_{ m d imes e5}$	$_{ m d imes e5}$
5	<b>å h5</b> ⊥?!	

Looks like I thought this will force an exchange of Queens. Rather than moving the Bishop again, it was better to continue development with 5.  $\triangle$ c3  $\triangle$ c6 6.  $\triangle$ f3  $\triangle$ b4 7.  $\triangle$ d2=.

5		<b>≜</b> d7
6	≜×d7+	$\odot \mathrm{b}{ imes}\mathrm{d}7$
7	$\mathbf{\hat{Q}e2}$	<b>≜</b> b4+
8	ark d2	<b>≜</b> ×d2+
9	$ ullet ext{w} imes ext{d}2$	O-O
10	6)bc3	

Black has better development and slightly better position. But here onwards, he started making weak moves.

11 ... **②g4??** 

This leaves the Knight on d7 singly-protected, thereby losing it. A fork on f2 is tempting, but before making that, you need to make sure your camp is secure!

#### 

12...  $\triangle \times f2$  is not better, because of 13.  $\underline{\ }$  $\underline{\ }$  $\underline{\ }$  $\times d8 + \underline{\ }$  $\underline{\ }$  $\underline{\ }$  $\times d8 + \underline{\ }$  $\underline{\ }$ 

<b>13</b>	≅×d7	$\bigcirc \times \mathbf{f2}$
14	Ïf1	<b>ℤ</b> ad8??

Losing another piece. 14... \( \Delta g4 \) attacks both e3 and h2 and will win a pawn.

<b>15</b>	≅×d8	≅×d8
<b>16</b>	$\Xi \times f2$	${f g5}$
<b>17</b>	$\odot \mathbf{g3}$	<b>ℤf8</b>
18	<b><b>②f</b>5</b>	a6?

Typical Mr. G.! He doesn't miss a chance to simplify and go to an endgame. The idea behind 25. h4! was 26.  $\triangle$ e4!, with the threat of  $\Xi$ g7/ $\Xi$ g5+/ $\triangle$ f5 $\mp$ , forcing 26...  $\Xi$ g8 (26...  $\Xi$ ×h4 27.  $\triangle$ g6+) 27.  $\triangle$ ×g8. If 26...  $\Xi$ h6, 27.  $\triangle$ f6 and 28.  $\triangle$ f5 $\mp$ .

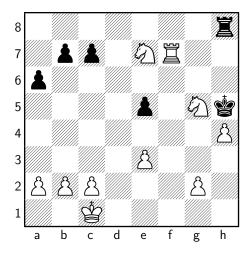

Eeswar doesn't care about losing material. Now the pawn on h6 is lost.

Leapfrog Simul: 2013.01.26

 $\bullet$  Ria

D00e: Queen's Pawn Game: Stonewall Attack

Ria kept losing material one after another, starting from move 12, and by move 24, we were three pieces up. Ria resigned when the position became hopeless.

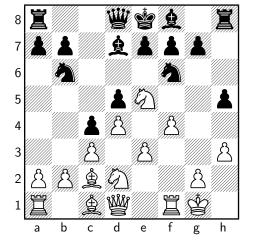

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
<b>2</b>	e3	<b><b><b><u>Ø</u>f6</b></b></b>
3	${}^{\dot{\underline{\bf d}}}{}$	<b>≜e6</b>
4	$\odot \mathbf{d2}$	$ ilde{f ar b}{ m d} 7$
5	f4	${}_{2}^{\sharp}{ m g}4$
6	$\odot \mathbf{gf3}$	h5
7	O-O	c5
8	c3	c4
9	&c2	$\textcircled{0}\mathbf{b6}$
10	h3	${ m \&d}7$
11	$\mathbf{\hat{\triangle}e5}$	

A blunder losing a piece.

<b>12</b>	≜×a4	≜×a4
<b>13</b>	<b>≝</b> ×a4+	$\odot \mathrm{d}7$
14	$\triangle df3$	

Being a piece up, White could have traded Queens with 14.  $2\times d7+$ , but why not continue the attack, having a big development and initiative?

 14
 ...
 罩b8

 15
 ♠g5
 b5

 16
 豐c2
 b4?

Loses a Rook, but 16...  $\triangle \times 65$  17. f×65 f6 18.  $\bigcirc 66$  f7 is not much better.

17 ②exf7 豐c8 18 ②×h8 豐a6

11 ... **②a4??** 

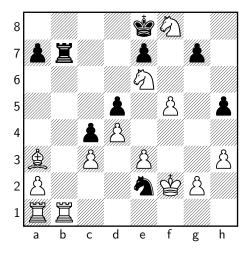

# 19 **營**g6+

I finally decided to simplify. There may be much better ways for a quick win, but too much complicated for a leapfrog simul!

<b>19</b>		₩×g6
<b>20</b>	$\textcircled{2} \times \mathbf{g6}$	$\Xi \mathrm{b6}$
<b>21</b>	f5	$b \times c3$

22	$b \times c3$	2f $6$
<b>23</b>	${f ar 2}{f e6}$	<b>≌</b> b7
<b>24</b>	ଉg×f8	2e4
25	<b>≜</b> a3	$\odot \mathbf{g3}$
<b>26</b>	≌fb1	②e2+
<b>27</b>	<b>⊈</b> f2	

Ria resigned. She can win a pawn with 27...  $\mathbb{Z} \times b1$  28.  $\mathbb{Z} \times b1$   $\mathbb{Q} \times c3$ , but the position is hopeless.

1-0

#### 2.49 Umesh (odd) & Mr. G (even) – Gavin (1–0)

• Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

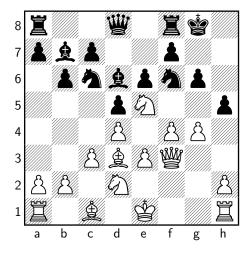

• Gavin

D00e: Queen's Pawn Game: Stonewall Attack

Gavin played the first 12 moves well, but had to leave early, so could not continue.

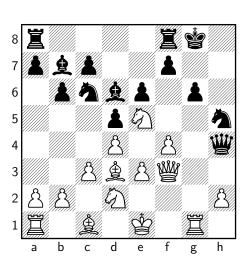

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1 2 3	$egin{array}{c}  ext{d4} \  ext{e3} \  cap{d3} \end{array}$	d5 ∅f6 ∅c6	$\begin{array}{c} 11 \\ 12 \end{array}$	 罩g1?	∕∆×h5
4 5 6 7 8	f4 ②d2 c3 ②gf3 ②e5	e6 \$d6 O-O b6 \$b7	12. 營h3, ter.	preventing 12	2 <b>"</b> h4+, is bet-
9 10	<b>≝</b> f3 g4	g6 h5	12		<b>豐h4</b> +

 $11 \quad \mathbf{g}{\times}\mathbf{h5}$ 

11.  $\Xi g1!$  would have been much stronger.

13 \( \dd{d}1!?

13.  $\mbox{\@model{W}f2}$  was simple and keeps the pawn on h2.

However, it is risky for Black to capture the pawn on h2: 13. dd = xh2?! 14. gd = xh2?!

公f1 豐g1 18. 公 $\times$ f8 曾 $\times$ f8 19. 豐 $\times$ h5+-. Gavin had to leave, so he resigned and went.

# 2.50 Umesh (odd) & Mr. G (even) – Arthur (1-0)

∘ Umesh (odd) & Mr. G (even)

Leapfrog Simul: 2013.01.26

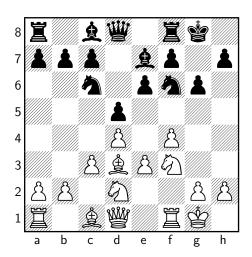

• Arthur

D00d: Queen's Pawn Game: 2. e3

Arthur left after 8 moves. The game was pretty even.

I made the odd-numbered moves and Mr. G. made the even-numbered moves for White.

1	d4	d5
2	e3	2c6
3	f4	e6
4	<b><b><b><u>Ø</u>f3</b></b></b>	<b>≜e</b> 7
5	${}^{\underline{\$}}\mathrm{d}3$	${f g6}$
6	O-O	2f $6$
7	$\textcircled{0} ext{bd2}$	O-O
8	c3	

Arthur left, without continuing. The game is even.
